KNOW YOUR RISK

HERE'S WHAT YOU NEED TO KNOW

Knowing your flood risk is the first step to flood protection. The flood hazard maps in your area are changing and so may your risk of flooding. And homeowner's insurance doesn't cover damage from flooding.

An **increase** in risk may mean you will be required to buy flood insurance when the maps become effective. A **decrease** in risk means the risk is still there, just reduced, and flood insurance is recommended.

Either way, the risk is real and you need to learn how the map changes will affect you.
